SIMPLE GEOMETRY RULES IN THE RIDGES COLLECTION

Fascinated by the flexibility of metal folding technology, designers at British design house Kukka created 'Ridges', a new range of wall mounted shelves and containers that introduce simple geometry and a splash of color to the home. Produced in both landscape or portrait form, the magnetic wall mounted shelves are folded and powder coated in sulfur yellow on one side and pure white on the other; meanwhile the triangular cutouts are also folded and powder coated in signal blue and dark blue or tomato red and wine red, to be fashioned into convenient trays.

Throughout the collection, the pieces are all seamlessly laser cut and created using folding machinery, eliminating the need for welds and mechanical fixings.
