

1141 Table Collection

Kukka Studio founder & creative director, Rona Meyuchas Koblenz, created a limited edition piece. Our founder and creative director, Rona Meyuchas Koblenz, created a limited edition piece, 1141 Table for inclusion within the Green Room at design junction, Salone del Mobile, Milan 2015. The Green Room was a space dedicated to showcasing sustainable design.

1141 was inspired from mining methods in a quarry, the stone results in a chiselled edge.

The designer uses reclaimed Caesarstone® quartz surface 1141 for the table top using CNC machine and then it is polished by hand. The metal legs are hand turned.

Cubo Light

Cubo is a sustainable light using low voltage LED source, made from FSC beech wood finished with Danish oil. Cubo is an extension to the Blocks range, a small light performing soft warm white spot light. The playful front metal ring comes in a selection of different colours. Thanks to this, the Cubo can fit in different interiors such as children's rooms, living rooms, working areas and so on.

Cubo is designed to be hung onto the wall - the light can be pointing upwards, downwards or even at an angle. It can be placed on a table, a shelf and even on the floor. It is safe to the touch and will fit into your hand palm.

Designer: Rona Meyuchas-Koblenz, Kukka Studio

Material: Hand Crafter FSC Beech wood

Felucca Large

Felucca© is a simple lampshade made from non-woven flame-proof Nomex fabric and snap fasteners, to be mounted directly onto a suspended light bulb.

It can then be shaped gently by hand, and several Feluccas can also be assembled to create a larger lampshade. Once mounted, The Felucca casts a soft, smooth and elegant light.

Designer: Rona Meyuchas K.
